1. Introduction:

This project involves creating a responsive and accessible mobile-first website for the display of athlete profiles. The main objectives include implementing an efficient CSS, ensuring accessibility compliance, and using innovative styling techniques to enhance user experience.

1. Hover Effects and Transitions:

Implementation:

- Touch-friendly hover effects for mobile devices are implemented with smooth CSS transitions.

2. Custom Typography and Iconography:

Implementation:

- Utilized responsive typography and sport-specific icons to enhance data representation.

3. Addresses Prefers-Reduced Preference:

Implementation:

- Implemented color schemes for dark mode and light mode and high contrast mode using CSS variables.

4. Image Optimization:

Implementation:

- Athlete profile pictures are displayed as circular images with proper scaling and cropping.

5. Accessibility:

Implementation:

- The site passes WAVE and aXe validations and adapts to user color schemes and reduced motion preferences.

6. Overall Presentation and Clarity:

Implementation:

- The project is structured logically, with clear documentation and easy navigation.
- All features are explained, and the code examples and techniques used are highlighted.

---

7. Validators Screenshots:

Include screenshots showing results from WAVE and aXe validators to demonstrate accessibility compliance.
